TOPTtoTOP Global Climate Expedition

To Whom it may concern

Each year, Presence Switzerland coordinates around 150 Swiss projects around the world. Authentic and surprising: from country programmes to classroom exchanges.

Presence Switzerland sets certain priorities when it comes to representing Switzerland abroad. The activities are focused on permanent priority countries, limited country programmes and projects in other countries where there is a need for action. Presence Switzerland also directs projects for a Swiss presence at world exhibitions, the Olympic Games and other major events abroad.

In collaboration with its Embassy in Santiago de Chile, Presence Switzerland supports the project of the "TopToTop Global Climate Expedition" conducted by Mr and Mrs Dario and Sabine Schwörer in Chile during the whole year 2005. Presence Switzerland fully encourages the actions of the couple in schools to raise children and decision makers' awareness of climate changes and to motivate them for an engagement for a better world.

Best regards
