

## TOPtoTOP Climate Solution Award 2010 in Switzerland

### **The Building of Green Communities to Fight Global Warming by Gao Ming**

#### **Summary of the Thesis**

**This thesis is intended to propose a wide range of solutions to build Green Community in China's rapid urbanization process. It suggests that, by integrating the efforts of the individual families and the local governments, various methods could be used to reduce the deterioration of global warming, and build a comfortable, healthy, and sustainable community for people to live in.**
