Self Introduction

It's a great honor to take part in the Top to Top event in July 14th in Swiss Pavilion. I had been totally inspired by Dario family, I would like to be brave like them in pursuing my dream. I really wish one day I can set up a nonprofit organization dedicating in environmental protection in China.

Social Practice Experience

International Renewable Energy Case Competition (IRECC) 2010.3-----2010.5

It will be the world's largest business case competition in 2010 dedicated to sustainable, clean energy investments. With great enthusiasm, I invited a student in Fudan University to join us to take part in this competition. After visiting the Renewable Research Institute of Shanghai Jiaotong University and much earnest research, we focus our business plan in solar energy market of Macedonia, we had been selected to the China final competition held in Beijing University. Although we were not the No.1 ,I still learned a lot though the whole process. The competition deepened my understanding to renewable energy and rose my interest to this great potential area of China and the whole world.

Volunteer in Shanghai Volunteer Group

It's really a great honor to join in this happy family. We are a group of warm-hearted people sharing the same spirit to help others and protection our environment. I had been the teachers for kids in the rural areas of Shanghai . And I will be a volunteer for Shanghai Expo WWF Exhibition Booth in October 2010.
